## Resident App

### Make It Easier For Residents to Engage While On The Go!

ResMan's Resident App offers members of your communities a seamless way to engage with you. As consumer preferences continue to shift toward mobile app experiences over mobile web, offering residents an app to make payments and create work orders improves resident satisfaction and helps your brand stay current with the times.

### Streamline the resident experience with an easy-to-use mobile app!

**Make it easier for residents to pay rent** – Today's consumers want to do everything on their phone, and paying rent is no exception. Now they can simply open the ResMan Resident App to make a rent payment!

**Increase on-time rent payments** – The less friction involved in paying rent, the greater the likelihood of on-time payment. The ResMan Resident App reduces friction by allowing residents to make and schedule payments any time from anywhere

**Improve the maintenance request experience** – Maintenance issues are a hassle for residents but when they can create and view the status of work orders in an app, they feel more supported

**Reduce the burden on your staff** – by providing an easy way for residents to “self serve” with payments and maintenance requests, your team will spend less time fielding maintenance request inquiries, processing paper checks, and tracking down late payments
