

On-Demand Insights With AI-Enabled Reporting

ReportsPro AI introduces **ROI**, ResMan's AI-enabled agent who uses natural language processing and cutting-edge data access technology to deliver real-time information and insights. With ROI at your service, there's no longer a need to search for reports or manipulate data in Excel. Simply ask ROI, and he delivers what you need in the format you need it.

How ReportsPro AI Works

With ReportsPro AI, users:

Create and refine **prompts** by asking ROI using **conversational language**

Expand prompts and enhance results by including **files**

Ask ROI to create **presentation-ready** tables, charts and graphs

Create, customize and save **dashboards** from responses

Export data and visuals directly to Excel

Why ReportsPro AI?

Organizations that use ReportsPro AI see many operational benefits, including:

Faster access to data and insights

Improved decision-making speed and confidence

More flexibility in creating KPIs and monitoring trends

Tailored visibility through personalized dashboards

Less time and resources spent manipulating data

Easier to respond to ad hoc data-related requests

ReportsPro AI also provides strategic benefits because at its core, the solution unlocks access to data — helping property management companies use insights more strategically to drive growth, innovation and differentiation in their market.
